Do not be misled; this seed is not from the vegetable itself, rather from the flowers of the onion plant. You may not have come across this oil but it has been in circulation for centuries. The oil is very much considered a "repair" oil, especially when it comes to hair & skin care. Packed with vitamin C (folic acid) this oil carries plenty of punch in the essential fatty acid department. It blends well on your hair (it does not smell like onion, do not worry!) & aids in the strengthening of hair follicles & nourishment of the scalp. It is equally beneficial on the skin due to its anti-bacterial & antioxidant properties & absorbs just as effectively on the skin. Onion Oil is making a come-back.
